ABSTRACT

At the request of the Assistant Secretary for Equal Opportunity, and in response to many other inquiries, the Housing Urban Development Library developed this completely revised edition of its 1969 bibliography--organized into eight sections dealing with general background materials, demographic patterns, fair housing laws: enactment and enforcement; social and economic aspects, the housing market and real estate practice, housing in the suburbs, new communities, government housing policies and programs, and bibliographies, respectively--to include primarily material published since 1969 with the exception of a few unique or classic publications that must be considered basic to any bibliography. The implementation of Title VII of the Civil Rights Act of 1968 has engendered an increasing amount of literature on the scope, problems and policies involved. Title VIII prohibits discrimination in the sale, rental, financing or marketing of housing, establishes remedies for such discrimination, and requires all Federal departments and agencies to administer their programs and activities in a manner affirmatively to further fair housing policies. Because the emphasis is on research, articles from popular periodicals have been omitted. Also included is an author index, including joint authors and editors. (Author/JM)

FOREWORD

The implementation of Title VIII of the Civil Rights Act of 1968 has engendered an increasing amount of literature on the scope, problems and policies involved. Title VIII prohibits discrimination in the sale, rental, financing or marketing of housing, establishes remedies for such discrimination, and requires all Federal departments and agencies to administer their programs and activities in a manner affirmatively to further fair housing policies.

At the request of the Assistant Secretary for Equal Opportunity, and in response to many other inquiries, the HUD Library developed this completely revised edition of its 1969 bibliography to include primarily material published since 1968, with the exception of a few unique or classic publications that must be considered basic to any bibliography on the subject.

Because the emphasis is on research, articles from popular periodicals have been omitted. However, many of the articles and books cited have extensive bibliographies listing earlier and/or popular references. These in addition to the list of bibliographies included in the final section, should provide the researcher with a wide variety of references.

Please consult your local library for any item, order from the publisher, the Government Printing Office, or from the National Technical Information Service when their number is supplied. HUD distributes only its own publications. Numbers in parentheses following the book citations are HUD Library call numbers.
